WORKERS' COMPENSATION**

What is the Missouri Workers' Safety Program?

The Missouri Workers' Safety Program (MWSP) was created by Missouri statute in 1992. The program's mission is to help Missouri employers:

- Improve workplace safety
- Reduce workers' compensation cost;
- Regulate safety services provided by insurance carriers.

What assistance can I receive from the MWSP?

The program's goal is to help employers eliminate fatalities and reduce the number and severity of injuries in Missouri's workplaces.

We offer:

- Free on-site safety and health reviews from our staff of safety professionals;
- Advice on workers' compensation insurance, experience modification, classifications, rates, reserves, choice of physician, and ways to reduce premiums;
- Safety videos loaned at no charge;
- Over 200 free safety publications;
- A list of independent safety consultants and engineers certified by the MWSP.

What about OSHA?

The MWSP does not:

- Make reports or referrals to OSHA
- Cite, fine, or penalize employers in any way

What workplace safety assistance can I receive from my insurance carrier?

Missouri Workers' Compensation law requires all workers' compensation insurance carriers to make comprehensive safety engineering and management services available to their insured employers upon request.

To receive assistance from the MWSP or services from your carrier, please fill out and return the request form on the back panel.

Results?

Since 1992 thousands of Missouri employers, like you, have received services from the MWSP. Here's what just a few of them have to say:

"...Missouri Workers' Safety Program helped our Company implement what proved to be a very successful safety program. We reduced lost workdays, decreased injuries, and reduced our workers' compensation insurance premium. Their periodic visits help us to continue with that success today."

Steve Dybus, Vice President
St. Louis, MO

"The Missouri Workers' Safety Program has been a valuable resource for local employers. The presentations have provided employers with the tools needed to reduce workers' comp injuries and to control workers' comp cost and claims. The presentations are always upbeat, informative and put in easy to understand terms."

Becky Vessel
Corporate Health Marketing Coordinator
Capital Region Medical Center
Jefferson City, MO

"The Missouri Workers' Safety Program has helped Orbseal's safety program in many ways. From providing OSHA compliance assistance to participating in our company's annual Health & Safety Fair, they are a valuable resource in providing a safe and healthful work environment for our employees."

Tim Davies, Safety Engineer
Orbseal, LLC
Richmond, MO
